

## 9x9

Thank you for purchasing this Game!

This game can be build to android,ios & windows phone 8. It is strongly recommend to import this package in an empty Project to avoid tag and iTween conflicts

### **GAME TEMPLATE FOLDER :**

- Fonts: Holds the font used in the game
- Scenes: All levels including the scene menu.
- Scripts: Holds all the scripts used in the game.
- Sounds: Holds all the sounds used in the game.
- Sprites: Holds all the textures used in the game which are used as sprites in Unity.
- Prefabs : Holds all the prefabs used in the game.

- **Materials :** The folder contains one material that is applied to the sound button.

**And :**

To avoid unnecessary mistakes, the asset you want to import into an empty project.

If you want to change the look of the game, just redraw the sprites in a folder "Sprites".

**Support :**

If you do not understand something, be sure to write on [eroshinvalera@gmail.com](mailto:eroshinvalera@gmail.com)

*Thanks, EVGames*
