(it's free)

1/ Import Dotween from the asset store : <http://u3d.as/aZ1>

The screenshot shows the Unity Asset Store page for DOTween (HOTween v2). The page layout includes a search bar at the top, a sidebar on the right with navigation links, and a main content area. The main content area is divided into two columns. The left column contains metadata: Category (Scripting/Animation), Publisher (Demigiant), Rating (5 stars, 339 reviews), Your Rating (5 stars), and Price (Free). Below this is an 'Import' button, which is highlighted by a red arrow. The right column features a large promotional image for DOTween, showing the 'Tweneer' and 'Sequence' components. The image includes the text 'transform.DOMoveX(100, 1); HO' and 'Animates values' and 'Animates other Tweeners and Sequences'. A 'STAFF PICK' badge is also visible. At the bottom of the page, there is a version and size section: Version: 1.1.135 (Dec 09, 2015) Size: 204.8 kB, and a support section with links for Support E-mail, Support Website, and Visit Publisher's Website.
