Colorscape - Mobile Ready Fun Puzzle Game

> **Description:**

Colorscape is a game to stay focused on what you read. Watch for the name of color matches with the color displayed or not. The game is freaking addictive and engaging.

The goal of the game is to identify the color written is matching with the color displayed or not. You'll be asked to either answer Yes or No or you'll be asked to select the color. Watch out for the time because it's not infinite.

✓ **Key Features :**

- Fully customizable code, fully commented and easy to modify.

- Made with unity uGUI.

- 4 Highly addictive game modes.

- Sound, music integrated.

- Unity Ads integrated for rescue.

- Supports all platforms.

- 24X7 full technical support available.

> **Game Setup :**
This game basically works around mainly 4 screens and game controller. Main Screen, Select Mode Screen, Game play screen and Game Over Screen. All the navigation of the screens are controlled by the GameUIController which is a gameobject inside Controllers. The GameUIController holds prefab and information about all the screens and all the screen navigation information gets passed through this screen.
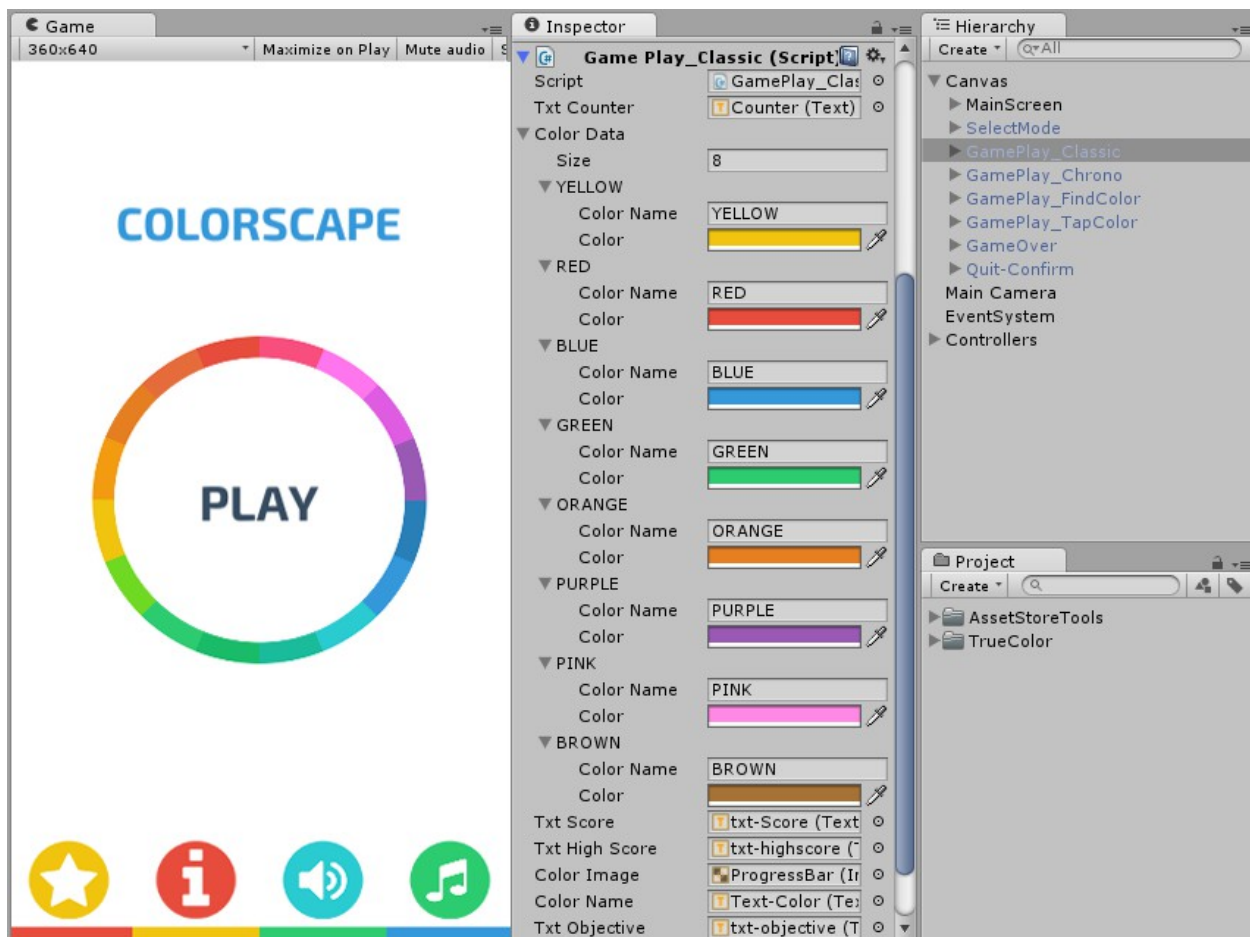

✓ **Game Modes :**
The game contains total 4 types of game modes.

1. **Classic :** In the classic mode, you'll be asked if the displayed color filling bar is of displayed color or not. You'll have limited time to decide from true or false. Time to answer will gradually reduce with the progress. True answer will move to next question and false answer will lead to game over.

2. **Chrono :** Chromo mode is somewhat like classic mode but here you will have limited time to answer questions in the row. In the fix the time, the score will keep increasing with true answer but wrong answer will decrease score as well.

3. **Find The Color :** In this mode, you'll be asked to select the displayed color. Don't go with color but go with the text. Here also you'll have limited time to answer the question.

4. **Tap The Color :** This is most addictive and challenging mode of the game, 4 circles will be displayed with the different color and color name, you'll have to select the correct one before the time bar gets filled.

✓ **The Color Setup :**

This game is using 8 different color, the colors of the game can be easily modified from the inspector of the respective game mode. You can also keep different color combination for each mode. See the below screenshot to get idea about how to change the color.

This game is using animator controller and animation for the each UI Effect or animation and it doesn't have any third party tool used for tween/animation. At few places animation is also triggering specific event also.
